

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Chapel Hill ES	<p>I live in PB30, and suggest the following alternative options</p> <p>Option 1. Place PB 30, 26, and 164 back into the Chapel Hill Elementary School district.</p> <p>Rationale</p> <p>a. Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary. This would eliminates the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.</p> <p>b. Adds a very diverse community back into Chapel Hill Elementary School</p> <p>c. Promote socio-economic diversity, but not having Chapel Hill Elementary be compromised of predominately single family homes, while moving a majority of the multi-family units to Northeast Elementary.</p> <p>d. This option would lower the risk of early overcrowding of Northeast Elementary School. Other area schools have room for expansion through use of mobile units. However, the layout of the Northeast Elementary School does not allow for such. This school should not over placed at or near capacity to start with. This would leave the school few options for potential future growth.</p> <p>e. Provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.</p> <p>Option 2. Place PB 30, 26, and 164 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School</p> <p>Rationale</p> <p>a. Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary. This would eliminates the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd</p> <p>b. This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Chapel Hill ES	<p>I live in PB30 and recommend aleternative options such as Placing PB30, 26, and 164 back into the Chapel Hill ES district. it adds very diverse community into the Chapel Hill ES. It will strongly promote diversity, but not having Chapel Hill ES be compromised of predominately single family homes, while moving majority of multifamily units to North East ES.</p> <p>Also will provide ease to Chapel Hill ES and will remain much lower capacity than current enrollement.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Chapel Hill ES	<p>I live in PB30 and I would suggest that we get included in Chappel Hill district and use Honeygo blvd as the natural boundary. this can help eliminate the safety concerns that us parents in the community have, which is turning out onto Honeygo during busy hours and then merge into two lanes of traffic that typically moves at 50+mph speed. In the near future, PB30 will only have one single entrance/exit to go in and out of the community. Futhermore, adding PB30 back to Chapel Hill will create a very diverse community back into Chapel Hill Elementary School and provides better learning experience for the kids. this option also promote socio-economic diversity. It would also lower the risk of early overcrowding of Northeast Elementary School with no room to grow while provides relief to Chapel Hill as it remains at a lower capacity.</p>
Chapel Hill ES	<p>I live in PB30 and I suggest the following alternative options:</p> <p>A. Place PB 30, 26 and 164 back to Chapel Hill Elementary school district.</p> <p>Rationale:</p> <p>A. Utilize the four lane highway of Honeygo blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concern of school bus exiting to the right of Honeygo blvd and then immediately turn left to Joppa. This a very dangerous exit in the early morning and afternoon commutes.</p> <p>B. This will add to the diversity of Chapel Hill Elementary School</p> <p>C. This would lower the risk of early overcrowding of northeast elementary school. Northeast elementary does not have room for expansion through use of mobile units. This school should not be at over or near capacity to start with.</p> <p>D. Provides needed relief to Chapel hill elementary school as it will remain at a much lower capacity than current enrollment.</p> <p>E. promotes socio economic diversity but not having chapel Hill Elementary be compromised of predominantly single family homes while moving a majority of the multi family units to Northeast Elementary</p> <p>Option 2: Place PB30, 26 and 164 back to Chapel Hill Elementary School district and move PB 5, 8 and 9 back to Vincent farm elementary school.</p> <p>Ratonale.</p> <p>A. Utilize the four lane highway of Honeygo blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concern of school bus exiting to the ight of Honeygo blvd and then immediately turn left to Joppa. This a very dangerous exit in the early morning and afternoon commutes.</p> <p>B. This would provide additional relief to Chapel Hill Elementary without overcrowding Vincent farm elementary. Vincent farm is due for additional relief in 2020 with the addition of a. Ew school near Ridge Road. This would eliminate the need to almost 100 children to be moved to the new schools who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm elementary in future as well which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Chapel Hill ES	<p>I live in PB 30 and suggest to place PB 30,26 and 164 back in Chapel Hill elementary school district. My reasons for this are:                      since there is no traffic signals between Ebenezer road and Joppa road ,during the early morning commute its hard for school buses to take left turn from Honeygo to Joppa road soon after exiting right from PB30.</p> <p>It adds a very diverse community to Chapel Hill which promotes the socio-economic development of school as a whole.</p> <p>This option would also lower the chances of overcrowding of Northeast elementary school because other school areas have space for expansion by mobile units which doesn't seem like can happen in the layout of NE elementary school.</p> <p>Suggestion -2: Place PB 30,26 and 164 back inot Chapel hill district and move PB 5,8 AND 9 back to Vincent farm Elementary school. My reasons for this are:                      As per the current proposal Vincent farm ES can have a relief in 2020 with the addition of new school near Ridge road, which would eliminate the need of another move of almost 80-100 children again in 2 years to new school.                      Inturn all this will provide additional relief to Chapel Hill as well.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Chapel Hill ES	<p>I live in PB 30 and suggest the following alternative options</p> <p>Option 1. Place PB 30, 26, and 164 back into the Chapel Hill Elementary School district.</p> <p>Rationale</p> <p>a. Place PB 30, 26, and 164 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School</p> <p>Rationale</p> <p>a. The above rational from #1 above</p> <p>b. This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Chapel Hill ES	<p>I live in PB 30 and suggest other options.                      Option 1, place PB 30, 26 and 164 back into the chapel hill elementary school district</p> <p>Some reasons are:</p> <ol style="list-style-type: none"> <li>1. It will provide much lower capacity than current enrollment</li> <li>2. This will add a very diverse community back into chapel hill elementary school</li> <li>3. This will lower the risk of early overcrowding of northeast elementary school.</li> <li>4. Promote socio economic diversity but not having chapel hill elementary be comprised of predominately single family homes while moving a majority of the multi family units to northeast elementary</li> </ol> <p>Option2:</p> <p>Place PB 30, 26, and 164 back into Chapel hill, and move PB 5, 8, 9 back to Vincent farm elementary school</p> <p>Reasons:</p> <ol style="list-style-type: none"> <li>1. Utilize the four lane highway of honeygo Blvd as a major infrastructure barrier to geographic boundary. This is a safety concern</li> <li>2. This will decrease enrollment number to Chapel Hill elementary and not overcrowding Vincent Farm Elementary.</li> </ol>
Chapel Hill ES	I feel like this option also includes too many townhome communities which can lead to overcrowding
Chapel Hill ES	Does not fill the new school to capacity and maintains in most other areas.
Chapel Hill ES	Better than A, but not as good as C. I would not be upset with this option, but I do not prefer it.

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Joppa View ES	Much more even lines, distribution makes more sense
Joppa View ES	I believe its a great idea to have all children coming from neighborhoods on the left of Silver Spring, at the same school, Joppa View
Joppa View ES	As a parent at JVE, I feel this option does not address the current need to alleviate the overcrowding issues the school currently faces. To wait 2 years to address this issue is not in the best interest of the school or community.
Joppa View ES	Addresses the goals
Kingsville ES	Same
Oakleigh ES	I am still a long distance from my child's elementary school (Oakleigh) as I live at the end of putty hill and Walter. It takes over 1/2 hour to drive to my child's school now. Why would this group of Oakleigh not feed into Carney.
Other (Please specify):	Is bad for Carney which is already overcrowded with 5 trailers. Would increase the poverty rate to 51%.
Perry Hall ES	While this option resolves some of the issues from option A, the borders on the east side are poorly thought out. There are children very close to the new school that will go to PHES, while children four times further away will go to the new school. Again, should not have been a final option.
Perry Hall ES	This option requires multiple changes and is in the long term the most disruptive plan. It has the least flexibility for the future growth and development of the Perry Hall community.
Perry Hall ES	This option continues the division in our neighborhood (PB 148 and 153). Our children should be kept together.
Perry Hall ES	The point of redistricting is to alleviate overcrowding, right now on option C- if you added PB 40,41,43, 44 (our neighborhoods block), 45 to the new Northeast elementary school it would increase enrollment from 614 to 643. This is still well under capacity and it would help Perry Hall Elementary school go from 594 to a capacity of 565 which makes that closer to the school's capacity of 528.
Perry Hall ES	Resolves overcrowding
Perry Hall ES	Provides enrollment capacity relief to the area while leaving the new school with room to grow.
Perry Hall ES	Overcrowding at the corner of PHES is a huge issue
Perry Hall ES	Option b is allowing much diversity to Perry Hall Es school. Between the apartments and Dunfield area a majority are going to Perry Hall. To maintain equity other schools should have more of Dunfield or Perry Hall Apartments.
Perry Hall ES	Option B does not relieve the overcrowding felt by Joppa View or Vincent Farm. Vincent Farm will subject to higher enrollment in the very near future as there is much development going on in that area, this development will put enrollment right back where the school currently is and leaves the school still overcrowded. Further this option creates boundaries for schools that are geographically spread out, instead of keeping students near their classmates and schools, they will be much more dispersed.
Perry Hall ES	Maintains my neighborhood together. Seems to address the school capacity issues and allows for growth at the elementary schools in high growth areas in the northeast area.
Perry Hall ES	Looks good to me, I am in favor of this option.
Perry Hall ES	I would prefer to send my youngest to Perry Hall Elementary school next year. It is where my daughter, now in middle school, attended elementary school.

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Perry Hall ES	Beneficial for all students, parents, and communities. Addresses issue of overcrowding and provides new opportunities for young students.
Perry Hall ES	B does not really alleviate the bigger school's populations for very long.
Perry Hall ES	Although it's not as good as option A as far as fixing the overall overcrowding its much better than option C. Option B fixes this problem for more schools.
Perry Hall ES	Also our address is not in school zone for the new school in option B.
Seven Oaks ES	Two of the courts in closest proximity to Seven Oaks Elementary are zoned for Gunpowder in this option. This totals only 19 kids.
Seven Oaks ES	This is sad, seven oaks area will become a 4-10 star school. You people are sad its all about the money.
Seven Oaks ES	Strongly opposed to this option. This takes my children out of a walkable distance to Seven Oaks, with no major roads to cross, and instead moves them to a school over 1 mile away. Our community is quite literally the geographic closest to Seven Oaks Elementary and a main reason of why we live where we do.
Seven Oaks ES	My opinion on all 3 options are the same. My son would be switching to Gunpowder from Seven Oaks. My main concern with this is that he will be going to an already overcrowded middle school (Perry Hall) instead of Pine Grove Middle. I think this problem needs to be addressed as well as part of this problem. I am not aware of any plans in place to address the middle school overcrowding problem.
Seven Oaks ES	I don't really like that it moves many people who live very close to Seven Oaks to Gunpowder.
Vincent Farm ES	Would like the Fieldcrest Neighborhood to be in the Chapel Hill and Perry Hall school zones
Vincent Farm ES	VF is very overcrowded.
Vincent Farm ES	Using data, this option provides the best long term solution to overcrowding now & in the future.
Vincent Farm ES	This still leaves vincent farms district too big
Vincent Farm ES	This option seems to best address the overcrowding issues.
Vincent Farm ES	This option addresses current overcrowding, keeps nearby neighborhoods in the same district, alleviates bus schedules, plans for future growth, eliminates the need for yet another boundary change in the near future. Most population growth seems to be towards the east... at some point the redistricting needs to happen so that there isn't a kneejerk adjustment every time with some neighborhoods going through multiple changes every couple of years.
Vincent Farm ES	This is the most favorable option to help with decreasing overcrowding while increasing student safety, diversity and sense of community.
Vincent Farm ES	Seems that nobody thought the increased residential development would result to a population increase at the schools within this area. Overall poor planning by the County and City. All of these plans are about the same for where I live, but Option B has the lowest overall increase in overcrowding for where my children would go.
Vincent Farm ES	Same thoughts, let the community decide not one man.
Vincent Farm ES	Same reasons as option a
Vincent Farm ES	Same as Option A
Vincent Farm ES	reduces overcrowding in both current and possible future schools

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Vincent Farm ES	Option B provides the best distribution of students among schools, and affects a much lower amount of students. It provides good diversity and community consistency. It also excludes PB 164 which could include a large amount of students with that development that might be better distributed to JVES, NE area school, or VFES.
Vincent Farm ES	Option B provides a credible option to maintain school diversity, as well as free and reduced lunch percentages, while addressing current overcrowding at schools such as Vincent Farm Elementary.
Vincent Farm ES	Not like
Vincent Farm ES	My thoughts are the same for both Option A, B, and C that removing us from Vincent Farm Elementary District significantly reduces our minority percentage, ie from almost 50% down to 38%, ie 5/10 vs. 3.5/10). I wanted my children to have a broad experience in their early education as I did not have this and felt it was an extreme detriment to my development.
Vincent Farm ES	My kids would be changing schools with Options B. However looking at the over all capacities of the school Chapel Hill will have room to add the additional kids that could be coming with the new development on cowington.
Vincent Farm ES	Keeps my child in their current school
Vincent Farm ES	It address overcrowding
Vincent Farm ES	Ideal option of the 3 presented for Fieldcrest Families. Keeps neighborhoods together, supports feeder patterns, optimal enrollment/size of schools.
Vincent Farm ES	I think this is the best option with regard to addressing overcrowding, future enrollment needs, and keeping neighboring communities/neighborhoods together.
Vincent Farm ES	I think our neighborhood (Fieldcrest off of Allender Rd.) should move to Chapel Hill to reduce overcrowding and to ensure our children are able to go to Perry Hall Middle and High like we were promised at settlement and not go to Middle River.
Vincent Farm ES	I think option B provides the most relief regarding overcrowding.
Vincent Farm ES	I support the fieldcrest community switching to Chapel Hill mainly due to the overcrowding in this addresses that problem
Vincent Farm ES	I have to say, I am surprised at this option. It appears to be intentionally gerrymandered. While I know both Chapel Hill and Vincent Farm desperately require relief, I do not think this is fair to the new school. Further, this appears to put every multi-family unit in the new school area. The new school will have double the amount of free and reduce lunches as Chapel Hill (and this number is probably low, as the 200 unit apartment at PB 164, will probably only further this divide. This option just does not seem to follow any major infrastructure barrier as a geographic bounday, but seems to avoid them.
Vincent Farm ES	I have many concerns with the size in Vincent Farm. I don't think it is not safe to have a building with this many students. There are not many bathrooms, cafeteria space, classroom space, and outdoor playing space to accommodate all of the students.

Respondent Live in Elementary Zone	What are your thoughts regarding Option B?
Vincent Farm ES	I am not sure how this map follows and geographic or infrastructure boundaries. It appears randomly scattered to pull in more to NE Area ES. However, there must be a better way to accomplish in a more symmetrical manner. In adding the 200 apartments to the NE Area ES, rather than to Chapel Hill, it appears for some reason some one is purposely excluding them based on their economic status. I see Chapel Hill's free and reduce lunches are much lower than all the neighboring schools, is this just another way to keep this school sheltered. Isn't this process supposed to be fair to all members of the community, regardless of race, religion or economic status. I would add PB 26 and 164 back to Chapel Hill. This would give the new school some relief for being over crowded, and would promote economic diversity amongst the schools.
Vincent Farm ES	Good choice for our large neighborhood to be moved and eliminate crowding at VFES
Vincent Farm ES	Best option for our community
Vincent Farm ES	Balances overcrowding in schools that will not be alleviated by additional school buildings.
Vincent Farm ES	Again addres the needs of each planning block while giving relief to each school.
Vincent Farm ES	Addresses overcrowding and feeds into Perry Hall Middle and High
Vincent Farm ES	Addresses overcrowding
Vincent Farm ES	Address overcrowding

Exhibit #3 - Option #C

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Carney ES	This option puts Carney ES at 113% utilization and the school is already struggling with student behavior issues. Adding more students with no additional supports to the school will not help us.
Carney ES	The current crowded conditions need to be corrected before new students are enrolled.
Carney ES	See objections to Options A and B.
Carney ES	Same reason as Options A and B
Carney ES	Same as the others new school is much far and current school Carney is less than half mile.
Carney ES	Same as my thoughts for Option B.
Carney ES	overcrowding
Carney ES	Option C and Option A are both divide the Dunfield Area. It adds a great deal of children to Carney ES and doesn't seem to consider the neighborhood/community division.
Carney ES	Not good for the Carney ES and Carney community.
Carney ES	Not a viable option to address overcrowding.
Carney ES	No
Carney ES	Leave Carney Elementary alone.
Carney ES	Every option increases capacity at Carney, unclear why Carney is gaining students if new school is being built.
Carney ES	Carney has one elementary school. The scenario is not beneficial to the students in the Carney community because it will bring more poverty to the student populations raising the poverty rate as defined by FARM data from 43% to 51%,

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>We live in PB30 community and I suggest - Option 1. Place PB30 back into the Chapel Hill district. Use Honeygo blvd as natural infrastructure boundary. this eliminates the safety concerns that the community parents have regarding the school bus having to turn out onto a busy 50+mph traffic onto Honeygo during traffic hours. PB30 community will only be left with one entrance/exit in/out of the community in the near future. There is no traffic control between Ebenezer and Joppa and traffic on Honeygo typically travels in excess of 50+ mph speed. PB30 community is very diverse and adding it back into Chapel Hill, it helps bring diversity to Chapel Hill. This option helps alleviate over crowding issue at Chapel Hill and does not pre-maturely over-crowd the new Northeast school which it has no room to grow to begin with.</p> <p>Second option is put PB30 back in Chapel Hill and leave PB5/8/9 un-touch in Vincent Farm. Vincent Farm is due for relief in 2020 with new school coming near ridge road. This will help relief Chapel Hill and still not over crowding Vincent Farm would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years when the new school comes into the picture. There are other options that's in the plan to relief Vincent Farm in the near future. By moving current Vincent Farm students over to Chapel Hill will pre-maturely stress Chapel Hill school and pre-maturely put Vincent Farm under capacity.</p> <p>The third option proposed is to help relief Chapel Hill and the new Northeast elementary school in the long term, which is to move Chapel Hill's eastern school boundary from Rt7, westward to I-95. Using I-95 as natural infrastructure boundary and expands Chapel Hill's western boundary. By doing so, this helps relief Chapel Hill's current overcrowding situation and also allows the new Northeast elementary school to not be at capacity right at the beginning and still allows room for growth. This will also help address having the need to re-district Chapel Hill (or the new Northeast school) in the near future.</p> <p>Areas in Perry Hall are very dense with population with little real estate to possibly put more new school for future relief in the Perry Hall area. In the contrary, eastern baltimore county is not as dense in population and has a lot more room to build and support future school relief. Vincent Farm could potentially get relief from Chase Elementary, Victory Villa Elementary and the up-coming new elementary school in 2020.</p>
Chapel Hill ES	<p>This options seems to keep kids closer to home and grouped with families with similar incomes</p>
Chapel Hill ES	<p>This option puts the new school a little to close to capacity at the onset. Ideally PB30 should move to Chapel Hill. and PB9,8 and 5 to Vincent Farm. This will leave all 3 schools below capacity while preventing 96 kids from having to transition schools in the middle of the formative years.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	This option keeps communities together especially those on Cowenton all going to Chapel Hill.
Chapel Hill ES	This option best accounts for future growth and future relief some schools will get through additional new school construction. This option starts the new elementary school out with a lower utilization rate that will allow for future growth. The option also seems to have boundaries that are more compact and better respect major roads and other geographic features as school boundaries.
Chapel Hill ES	<p>This is a resident of PB 30, and I would like to propose two options that place PB 30 back into the Chapel Hill Elementary School district.</p> <p>Option 1: Place PB 30 back into the Chapel Hill Elementary School district</p> <ul style="list-style-type: none"> <li>- Safety, safety, and safety. Utilize the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary.</li> <li>- Maintaining diversity at Chapel Hill Elementary School</li> <li>- Lower risk of early overcrowding of Northeast Elementary School. Northeast Elementary does not allow for expansion.</li> <li>- Chapel Hill remains at lower capacity than current enrollment</li> </ul> <p>Option 2: Place PB 30 back into the Chapel Hill Elementary School district, and move PB 5, 8, and 9 back to Vincent Farm Elementary School</p> <ul style="list-style-type: none"> <li>- Safety, safety, and safety. Utilize the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary.</li> <li>- Maintaining diversity at Chapel Hill Elementary School</li> <li>- Lower risk of early overcrowding of Northeast Elementary School. Northeast Elementary does not allow for expansion.</li> <li>- Additional relief to Chapel Hill Elementary</li> </ul>
Chapel Hill ES	Strongly opposed thank you

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	Place PB30 back into the Chapel Hill Elementary School District
Chapel Hill ES	<p>PB30 is .3 miles from Chapel Hill. Our children don't walk every day (some do) but most families walk to school events. Development is already in place (we have the drawings) to connect PB30 directly through the Strawberry Field development directly to Chapel Hill. it would be a shame to walk across Honeygo with young children to attend school events as a family. Technically we fall under the definition of walkers. I suggest a consultant drive into our neighborhood at 8:30 and try to get around at the speed of a school bus. This will bring to light, one the diversity on our bus stop, two the danger of crossing honeygo without lights on the stretch before our development, and three, how close Chapel Hill really is to our community.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>PB12, 9, 10 and 11 need to be split up. For some reason the committee is crying community. these communities are not connected and given the numbers are putting a huge strain on making other logical movements to the map. 2 or 3 citizens that sent emails early, don't speak for the entire community. Lots of the residents in PB12 and 9 want to stay at Vincent Farm. Leaving PB12 or 9 or both at Vincent Farm, will allow PB30 to stay in Chapel Hill. PB30 is .3 miles from Chapel Hill once the new sidewalks have been installed. PB9 and 12 are over 2 miles away. By leaving PB30 in Chapel Hill and leaving PB9 and 12 at Vincent Farm, this allows the new school some room to breath, Vincent Farm is getting relief in 2020 and there is no guarantee all of the development in there area even happens.</p>
Chapel Hill ES	<p>Our Parkside community is being divided from existing neighborhoods.</p>
Chapel Hill ES	<p>Our home falls into all three options and this option seems to include more of the single family neighborhoods</p>
Chapel Hill ES	<p>Option C presents all the schools with a boundary that looks appropriate at least visually. The new school opens at 87% - allowing room for some future growth and VFES is left below 90% as well. While JVE and PHE are left over capacity that is expected to be relieved by the next new school.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>Option C has an estimated utilization at the new school under 90%. With little to no room for trailers, I think this is the best option to ensure class sizes stay reasonable at the new school as the area continues to grow with new homes and additional students.</p>
Chapel Hill ES	<p>Option 1. Place PB 30 back into the Chapel Hill Elementary School district.</p> <p>Rationale</p> <p>a. Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary. This would eliminates the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.</p> <p>b. Adds a very diverse community back into Chapel Hill Elementary School</p> <p>c. This option would lower the risk of early overcrowding of Northeast Elementary School. Other area schools have room for expansion through use of mobile units. However, the layout of the Northeast Elementary School does not allow for such. This school should not over placed at or near capacity to start with. This would leave the school few options for potential future growth.</p> <p>d. Provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.</p> <p>Option 2. Place PB 30 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School</p> <p>Rationale</p> <p>a. The above rational from #1 above</p> <p>b. This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>Option 1, place PB 30 back into the chapel hill elementary school.</p> <p>Reasons:</p> <ol style="list-style-type: none"> <li>1. This will provide relief to Chapel Hill as it will remain at a much lower capacity than current enrollment</li> <li>2. This will add a very diverse community back into Chapel Hill</li> <li>3. This will lower the risk of early overcrowding of Northeast elementary school. Other area schools have room for expansion through use of mobile units. But the layout of the northeast elementary school does not allow for such. This school should not over placed at or near capacity to start with.</li> </ol> <p>Option 2: Place PB 30 back into the Chapel Hill elementary school and move PB 5, 8 and 9 back to Vincent Farm</p> <p>Reasons:</p> <ol style="list-style-type: none"> <li>1. Utilize the 4 lane highway of honeygo blvd as a major infrastructure barrier to geographic boundary. This is for safety issue.</li> <li>2. This will have more relief to Chapel hill elementary without overcrowding Vincent farm elementary.</li> </ol>
Chapel Hill ES	Nothing
Chapel Hill ES	none
Chapel Hill ES	Love this option the best
Chapel Hill ES	<p>Leaving PB30 in Chapel Hill gives relief to the new school and keep diversity in Chapel Hill. Sending PB12 and 9 to Kingsville saves some redistricting in the future while keeping all school number under capacity. Safer route for students as well.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>Include PB 30 in Chapel Hill elementary school and remove PB 5,8 AND 9 to stay in Vincent farm zone again PB 30 offers significant cultural diversity to Chapel Hill and why move the kids form their current schools in both zones when the numbers for long term enrolment are similar and Chapel hill is performing very well even being as overcrowded currently. The VF school zone has Chase and Oliver beach ES for relief in future if need be and the new NE area ES has NO ROOM for expansion or growth at all</p>
Chapel Hill ES	<p>I'm very upset to be districted out of CHE, but at least option c leaves the new NE School with a little room to grow.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB30, and suggest the following alternative options</p> <p>Option 1. Place PB 30 back into the Chapel Hill Elementary School district.                      Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â</p> <p>Rationale</p> <p>Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier for a geographic boundary.Â This would eliminate the safety concerns associated with Honeygo Blvd.Â PB 30's only exit will be onto Honeygo Blvd in the near future.Â This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd.Â This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.Â Adds a very diverse community back into Chapel Hill Elementary School This option would lower the risk of early overcrowding of Northeast Elementary School.Â Other area schools have room for expansion through use of mobile units.Â However, the layout of the Northeast Elementary School does not allow for such.Â This school should not over placed at or near capacity to start with.Â This would leave the school few options for potential future growth.Â Provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.                      Â</p> <p>Option 2.Â Place PB 30 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School                      Â</p> <p>Rationale</p> <p>The above rational from #1 above                      This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary.Â Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road.Â This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years.Â There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.Â Â Â Â</p>

This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB30, and suggest the following alternative options</p> <p>Option 1. Place PB 30 back into the Chapel Hill Elementary School district.</p> <p>Rationale</p> <ul style="list-style-type: none"> <li>a. Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier for a geographic boundary. This would eliminates the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.</li> <li>b. Adds a very diverse community back into Chapel Hill Elementary School</li> <li>c. This option would lower the risk of early overcrowding of Northeast Elementary School. Other area schools have room for expansion through use of mobile units. However, the layout of the Northeast Elementary School does not allow for such. This school should not over placed at or near capacity to start with. This would leave the school few options for potential future growth.</li> <li>d. Provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.</li> </ul> <p>Option 2. Place PB 30 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School</p> <p>Rationale</p> <ul style="list-style-type: none"> <li>a. The above rational from #1 above</li> <li>b. This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB30 and suggest the following alternative options:</p> <p>1. Place PB 30 back into the Chapel Hill Elementary School district.                      First, it uses the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.                      Second, it adds a very diverse community back into Chapel Hill Elementary School.                      Third, this option would lower the risk of early overcrowding of Northeast Elementary School. Other area schools have room for expansion through use of mobile units. However, the layout of the Northeast Elementary School does not facilitate that. This school should not start at or near capacity leaving it with few options for potential future growth.                      Lastly, this scenario provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.</p> <p>2. Place PB 30 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School                      The first reason for this option is the same as above. It would use the four lane Honeygo Blvd as the major infrastructure barrier to geographic boundary &amp; eliminate the safety issues regarding school buses turning right only to cross two lanes quickly to make a left onto Joppa Rd.                      Additionally, this alternative option would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need for almost 100 children to be moved to new schools, and then possibly need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB30 and I suggest the following alternative options:</p> <p>A. Place PB30 back to Chapel Hill Elementary school district.</p> <p>Rationale:</p> <p>A. Utilize the four lane highway of Honeygo blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concern of school bus exiting to the right of Honeygo blvd and then immediately turn left to Joppa. This a very dangerous exit in the early morning and afternoon commutes.</p> <p>B. This will add to the diversity of Chapel Hill Elementary School</p> <p>C. This would lower the risk of early overcrowding of northeast elementary school. Northeast elementary does not have room for expansion through use of mobile units. This school should not be at over or near capacity to start with.</p> <p>D. Provides needed relief to Chapel hill elementary school as it will remain at a much lower capacity than current enrollment.</p> <p>Option 2: Place PB30 back to Chapel Hill Elementary School district and move PB 5, 8 and 9 back to Vincent farm elementary school.</p> <p>Rationale.</p> <p>A. Utilize the four lane highway of Honeygo blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concern of school bus exiting to the right of Honeygo blvd and then immediately turn left to Joppa. This a very dangerous exit in the early morning and afternoon commutes.</p> <p>B. This would provide additional relief to Chapel Hill Elementary without overcrowding Vincent farm elementary. Vincent farm is due for additional relief in 2020 with the addition of a. Ew school near Ridge Road. This would eliminate the need to almost 100 children to be moved to the new schools who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm elementary in future as well which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB 30 and suggest the following alternative options</p> <p>Option 1. Place PB 30 back into the Chapel Hill Elementary School district.</p> <p>Rationale</p> <ul style="list-style-type: none"> <li>a. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</li> </ul>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	<p>I live in PB 30 and suggest following options with rationales:</p> <p>Place PB 30 back into Chapel Hill Elementary school district.my reasons for this are:</p> <p>The four lane highway of Honeygo Blvd and the busy Joppa road signal junction becomes a major obstacle to geographical boundary.This would eliminate the safety concern of exiting from PB 30 to Honeygo and turning left to Joppa road in the peak commuting hours.</p> <p>Since most of the kids from PB 30 are going to be done with elementary grades in next 2-3 years ,Chapel Hill elementary will remain at a much lower capacity than current enrollment.</p> <p>Suggestion 2:Place PB 30 back to Chapel Hill ES and move PB 5,8,and 9 back to Vincent Farm ES.My reasons for this are:</p> <p>Same risk of h highway of Honeygo Blvd as mentioned above in 1st suggestion.</p> <p>Chapel Hill will get some relief as Vincent farm is going to have another Elementary school come up in their district in 2020 near Ridge road.</p>
Chapel Hill ES	<p>Favorite option. Many children will remain at Chapel Hill ES. My child will be at the new facility with any of the options.</p>
Chapel Hill ES	<p>Does the most to keep neighborhoods together. Also addresses ability for new school to grow while relieving current schools of over crowding.</p>
Chapel Hill ES	<p>Does not support diversity</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	does not overcrowd new school, I am concerned with current home construction and would not want to start new school already at max capacity.
Chapel Hill ES	Better acknowledgment of limitations of the relief available through this process and future school construction and doesn't set up the new elementary school up for imminent overcrowding.
Chapel Hill ES	Another better option
Chapel Hill ES	<p>Alternative 1. Place PB 30 back into the Chapel Hill Elementary School district.                      Rationale</p> <p>A. Utilizes the four lane highway of Honeygo Blvd as a major infrastructure barrier to geographic boundary. This would eliminate the safety concerns associated with Honeygo Blvd. PB 30's only exit will be onto Honeygo Blvd in the near future. This is a dangerous exit in the early morning and afternoon commutes as there no traffic signal between Ebenezer Rd and Joppa Rd. This makes it difficult for school buses to be able to make a right then cross two lanes to able to turn left onto Joppa Rd.</p> <p>B. Adds a very diverse community back into Chapel Hill Elementary School</p> <p>C. This alternative would lower the risk of early overcrowding of Northeast Elementary School. Other area schools have room for expansion through use of mobile units. However, the layout of the Northeast Elementary School does not allow for such. This school should not over placed at or near capacity to start with. This would leave the school few options for potential future growth.</p> <p>D. Provides needed relief to Chapel Hill Elementary School, as it will remain at a much lower capacity than current enrollment.</p> <p>Alternative 2. Place PB 30 back into the Chapel Hill Elementary School District, and move PB 5, 8, and 9 back to Vincent Farm Elementary School                      Rationale</p> <p>A. The above rational from #1 above</p> <p>B. This would provide additional relief to Chapel Hill Elementary, without overcrowding Vincent Farm Elementary. Vincent Farm is due for additional relief in 2020 with the addition of a new school near Ridge Road. This would eliminate the need to almost 100 children to be moved to new schools, who may need to be redistricted again in less than 2 years. There are additional options for relief for Vincent Farm Elementary in future as well, which may include other nearby schools such as Chase Elementary.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Chapel Hill ES	Allows children on cowenton Avenue to maintain easy /quick access to school. Prevents children in that area from having to cross Honeygo blvd. intersection. This intersection has had many accidents.
Chapel Hill ES	300 apartments will be built at the end of Cowenton and adding them to the new school would overcrowd it fast and the new school is limited on space to utilize trailers! CHES can handle the number of potential students and has space for 4 or more trailers! It also cuts Cowenton in half, one side with all single family homes going to CHES.
Gunpowder ES	This plan looks reasonable
Gunpowder ES	This option seems to be the most efficient lay-out with regards to where the current and future schools are located. No students would be passing an existing school on their way to the new school.
Gunpowder ES	This option does the best job of taking into consideration future projected growth, new schools planned in the future, and the fact that the new school will not be able to accommodate trailers.
Gunpowder ES	This one seems the most balanced option.

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Gunpowder ES	This is the best option - it has the least impact on students, keeps neighborhoods together and makes the most logical sense. There is room to grow for the new school. While it doesn't help JVES and PHEM now, it lessens the impact of moving kids twice when the next elementary school is opened.
Gunpowder ES	Seems to help the overcrowding
Gunpowder ES	Same
Gunpowder ES	Option C does not utilize enough seats at the new NE ES. This increases overcrowding at other schools, and in my opinion does not do all that we can do to help with the overcrowding issue.
Gunpowder ES	Not as good as B
Gunpowder ES	My number one choice for school size
Gunpowder ES	It puts our whole neighborhood into one school and let's us stay at our current school
Gunpowder ES	It looks geographically like it makes sense so hopefully and hopefully it helps with overcrowding.
Gunpowder ES	It addresses overcrowding well.
Gunpowder ES	I think it's important to start the new school under capacity. As the community grows and as the young families in the new developments in the area grow up, the greater the enrollment. With limited space for cottages, it's important to be mindful of population growth so the new school does not go over capacity and raise class sizes

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Gunpowder ES	I love option C. I think it address multiple issues regarding overcrowding in the area and this new boundary outline flows well with existing neighborhoods.
Gunpowder ES	I like this because it addresses overcrowding.
Gunpowder ES	I am extremely concerned about bus routes for my children to go to the new school. They can't cross chapel road to get onto the bus. It is too dangerous. Right now they are the last stop to go to Gunpowder and get on without having to cross the street.
Gunpowder ES	Great
Gunpowder ES	Concerned about no sidewalks near/around new NE Elementary school
Gunpowder ES	Appears to best address over crowding.
Gunpowder ES	Again, disrupts current before and after school arrangements.
Joppa View ES	Would like to stay in same school
Joppa View ES	This is our preferred option because it allows most of our neighborhood and my children's friends at JVE to continue on at that school. However I do see that it would not be as practical if Joppa View wanted to have more children walk to school"but Joppa View is not especially walker-accessible anyway.
Joppa View ES	This addresses my main concern, the extreme overcrowding of the school.
Joppa View ES	overcrowding in Joppaview not addressed

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Joppa View ES	My children are in 4th grade at Joppa View Elem. I would like them to complete their education at JVE and be able to stay there for 5th grade and still have bus transportation.
Joppa View ES	Much more even lines, distribution makes more sense
Joppa View ES	As with Option B, the Manorfield neighborhoods would be maintained and all be able to stay at Joppa View
Joppa View ES	Addresses the goals
Joppa View ES	3 Schools are still very overcrowded and it seems to break up communities between chapel hill and vincent farms
Kingsville ES	Same
LiveInES	OptCtho
Oakleigh ES	I am still a long distance from my child's elementary school (Oakleigh) as I live at the end of putty hill and Walter. It takes over 1/2 hour to drive to my child's school now. Why would this group of Oakleigh not feed into Carney.
Other (Please specify):	Carney is already overcrowded with 5 trailers. It would increase the poverty rate to 51% putting a greater strain on the school resources.
Perry Hall ES	Won't solve current overcrowding issue.
Perry Hall ES	We'll be very satisfy to see my precious little girl attending a new school in our neighborhood. My Older daughter have attend Elementary school in Perry hall, where she attend 2 years in trailers classroom.

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Perry Hall ES	<p>This plan of the three is the only viable option. Option C requires the least amount of adjustments to become a better plan. Options A and B require significant changes to become a plan that could be acceptable.</p>
Perry Hall ES	<p>This option leaves too many schools overcrowded. There would be three schools at or over 113% capacity while not utilizing the new school. This option seems most unfair to those schools already high in enrollment.</p>
Perry Hall ES	<p>This option keeps all of the children in our neighborhood (PB 148, and 153) together. Currently, our neighborhood goes to two different elementary schools - Perry Hall Elementary School (PHES) and Chapel Hill Elementary School (CHES). A wooded area separates PB 148 and PB 147. Perry Hall High School (PHHS), which on the other side of the street, separates PB 148 and PB 43. We would like to be included with the rest of our neighborhood. The children play together, they will continue to grow up together, and we would for them to attend the same school together.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Perry Hall ES	<p>This option has the least level of disruption and decreases the level of over crowding the most in the given plans. While no solution offered complete resolves the needs of this over developed region it does reduce the burden that is placed on the 2 most over crowded schools in the district with the future development of a school on Ridge road this will reduce over crowding the best while decreasing the amount of times students must readapt to a new schools culture and mean s of education.</p>
Perry Hall ES	<p>The point of redistricting is to alleviate overcrowding, right now on option C- if you added PB 40,41,43, 44 (our neighborhoods block), 45 to the new Northeast elementary school it would increase enrollment from 614 to 643. This is still well under capacity and it would help Perry Hall Elementary school go from 594 to a capacity of 565 which makes that closer to the school's capacity of 528. To me, that is a no brainer and I hope that you consider this suggestion.</p>
Perry Hall ES	<p>The point of redistricting is to alleviate overcrowding, right now on option C- if you added PB 40,41,43, 44 (our neighborhoods block), 45 to the new Northeast elementary school it would increase enrollment from 614 to 643. This is still well under capacity and it would help Perry Hall Elementary school go from 594 to a capacity of 565 which makes that closer to the school's capacity of 528.</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Perry Hall ES	Our elementary school is overcrowded and understaffed. We need this redistricting to alleviate the problem and give our children more opportunities than they are given now in their current schools.
Perry Hall ES	Option C spreads diversity and equity with Dunfield and Perry Hall Apartments
Perry Hall ES	Option C does offer relief to some relief to most schools. However, there is disparity in the utilization rates, some schools remain more than 10% under while other are more than 10% over. It leaves room for Vincent Farm to expand its enrollment which is likely given the development in that area. However other schools are under their enrollment and they most likely will not face the same development concerns. It seems short sighted to leave Gunpowder and Seven Oaks with less than capacity when most likely new homes and students won't be a concern like they are for Vincent Farm, the new Northeast area school, Joppa View, and Chapel Hill. Three of which will be starting out with utilization rates over 100%.
Perry Hall ES	Not enough relief for some of the schools in the area while leaving the new school with lower than necessary enrollment
Perry Hall ES	Maintains the Snyder Lane Neighborhood in one school district that is within eye sight and technically closer

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Perry Hall ES	It divides the street I live on in half. I'd prefer if the whole street were unified.
Perry Hall ES	I like that it keeps my neighborhood together, however it has us changing schools and I do not think it adequately addresses the potential for growth in the area.
Perry Hall ES	C allows for growth in most schools, and it does not change the overall population of too many schools.
Perry Hall ES	Again, if there is a special needs program then my son would be at this school until middle school. Overcrowding is a big issue at PHES.
Seven Oaks ES	You already made your minds up. Seven oaks is now a 4 star school congrats .. housing will drop low and income housing will take over. People in this neighborhood made it great now take it apart, congrats!
Seven Oaks ES	Two of the courts in closest proximity to Seven Oaks Elementary are zoned for Gunpowder in this option. This totals only 19 kids.
Seven Oaks ES	Strongly opposed to this option. This takes my children out of a walkable distance to Seven Oaks, with no major roads to cross, and instead moves them to a school over 1 mile away. Our community is quite literally the geographic closest to Seven Oaks Elementary and a main reason of why we live where we do.

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Seven Oaks ES	<p>My opinion on all 3 options are the same. My son would be switching to Gunpowder from Seven Oaks. My main concern with this is that he will be going to an already overcrowded middle school (Perry Hall) instead of Pine Grove Middle. I think this problem needs to be addressed as well as part of this problem. I am not aware of any plans in place to address the middle school overcrowding problem.</p>
Seven Oaks ES	<p>I don't really like that it moves many people who live very close to Seven Oaks to Gunpowder.</p>
Vincent Farm ES	<p>Would like the Fieldcrest Neighborhood to be in the Chapel Hill and Perry Hall school zones</p>
Vincent Farm ES	<p>This option maintains diversity, keeps existing neighborhoods together and looks to the future enrollment the best.</p>
Vincent Farm ES	<p>This option is not the best, but I do not think it completely addresses future overcrowding.</p>
Vincent Farm ES	<p>This option addresses current overcrowding, keeps nearby neighborhoods in the same district, alleviates bus schedules, plans for future growth, eliminates the need for yet another boundary change in the near future. Most population growth seems to be towards the east... at some point the redistricting needs to happen so that there isn't a kneejerk adjustment every time with some neighborhoods going through multiple changes every couple of years.</p>
Vincent Farm ES	<p>Strongly would like option b</p>

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Vincent Farm ES	Still seems like this option could take PB 30 and place it back to Chape Hill. This would eliminate their concerns, still provide releif to Chapel Hill, and provide relief to Vincent Farm. That way all the schools win, as this would provide some room for Northeast to grow as well.
Vincent Farm ES	still leaves VF's district too large
Vincent Farm ES	Seems that nobody thought the increased residential development would result to a population increase at the schools within this area. Overall poor planning by the County and City. All of these plans are about the same for where I live, but Option C has the second lowest overall increase in overcrowding for where my children would go.
Vincent Farm ES	Same reasons as option a
Vincent Farm ES	Same opinion on option B but prefer B which appears to optimal for the neighborhoods/students.
Vincent Farm ES	Same as Options A and B
Vincent Farm ES	Same as before
Vincent Farm ES	Please do not make a map of one man's rant.
Vincent Farm ES	Option B and Option C are very similar.
Vincent Farm ES	Not like
Vincent Farm ES	N/A
Vincent Farm ES	Its good to have it
Vincent Farm ES	It keeps my child in their current school
Vincent Farm ES	It is a good alternative to Option B.

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Vincent Farm ES	I think our neighborhood (Fieldcrest off of Allender Rd.) should move to Chapel Hill to reduce overcrowding and to ensure our children are able to go to Perry Hall Middle and High like we were promised at settlement and not go to Middle River.
Vincent Farm ES	I support the Fieldcrest Community switching to Chapel Hill mainly due to overcrowding issues in this addresses that problem
Vincent Farm ES	I believe this option runs the risk of overcrowding NE Area ES. Can we not meet all goals by shifting some planning blocks. PB 30 seems to want back to Chapel Hill, this would provide NE Area ES some room. If Chapel Hill is then overcrowded, PB133 could be moved to Kingsville. After watching the videos, there was never any clear direction as to why Kingsville seemed to be immune from this redistricting. Also why have Chase Elementary and Olive Branch not been considered as viable alternatives to provide needed relief Vincent Farm. These schools could assist in unburdening our schools, rather than pushing everyone inward to the Perry Hall, which is already bursting at the seams.
Vincent Farm ES	I am in favor of Option C as it also seems to address overcrowding and future enrollment needs.
Vincent Farm ES	Almost as good as option B for Fieldcrest community, would be suitable alternative.

Respondent Live in Elementary Zone	What are your thoughts regarding Option C?
Vincent Farm ES	Addresses overcrowding, we stay at Perry Hall middle and High
Vincent Farm ES	Addresses overcrowding
