## Schools in Need of Improvement

The Maryland State Department of Education, in accordance with the requirements of the federal No Child Left Behind Act of 2001, has identified schools that have not made annual targets for two or more consecutive years in the same reported area. The number and percent of schools in each school system, the names of the schools, and the year identified follow. According to the Differentiated Accountability Pilot, approved by USDE, schools are placed in one of two pathways: Comprehensive Needs or Focused Needs. They are further identified according to stages (Developing or Priority) based on the number of years the school has been identified for improvement. For more information, see the Differentiated Accountability Pilot at [marylandpublicschools.org/MSDE/programs/esea](http://marylandpublicschools.org/MSDE/programs/esea).

FP – Focus Priority; FD – Focus Developing; CP – Comprehensive Priority; CD – Comprehensive Developing

## Baltimore County MSA Proficiency Levels

\* E: English; A: Algebra/Data Analysis; B: Biology

### Description of MSA Proficiency Levels

	Reading:	English:	Mathematics:	Algebra/Data Analysis:	Science:	Biology:
Basic %	Students are unable to read and understand literature and passages of information that are written for students in their grade.	Students have difficulty comprehending grade-appropriate literature and applying language choices when writing.	Students show they have only partially mastered the skills and concepts that Maryland expects students to know and be able to do at this grade level.	Students show they have only partially mastered the skills and concepts defined in the Maryland Algebra/Data Analysis Core Learning Goals.	Students show they need more work to attain proficiency. They use minimal supporting evidence, and responses provide little or no synthesis of information.	Students demonstrate a minimal understanding of biology concepts, principles, and/or skills. Student responses indicate limited synthesis of information and understanding of scientific terminology.
Proficient %	Students can read text written for students in their grade, and they can demonstrate the ability to understand literature and passages of information.	Students can comprehend grade-appropriate literature and apply appropriate language choices when writing.	Students show they have an understanding of fundamental grade-level skills and concepts and can generally solve entry-level problems in mathematics.	Students show they have an understanding of fundamental algebra/data analysis skills and concepts and can generally solve entry-level problems in algebra/data analysis.	Students use supporting evidence that is generally complete with some integration of scientific concepts, principles, and/or skills.	Students demonstrate a realistic and rigorous level of achievement by providing evidence of an understanding of biology concepts and the ability to use scientific evidence to generally integrate scientific concepts, principles, and/or skills. Student responses indicate some synthesis of information and understanding of scientific terminology.
Advanced %	Students can regularly read text that is above their grade level, and they can demonstrate the ability to understand complex literature and passages of information.	Students can regularly comprehend and interpret complex literature and consistently apply appropriate language choices to write effectively.	Students show they can regularly solve complex problems in mathematics and demonstrate superior ability to reason mathematically.	Students can regularly solve complex algebra/data analysis problems and demonstrate superior ability to reason mathematically.	Students use scientific evidence to demonstrate a full integration of scientific concepts, principles, and/or skills.	Students demonstrate an exemplary level of achievement by providing evidence of a complete understanding of biology concepts and the ability to use scientific evidence to fully integrate scientific concepts, principles, and/or skills. Student responses indicate a complete synthesis of information and understanding of scientific terminology.

Approximately 99% of Maryland students take MSA. The Basic Level is below the goal set for all students.

### Maryland School Assessment (MSA)

The MSA measures what students in grades 3-8 know about reading and mathematics. High school performance is measured by the English and Algebra/Data Analysis High School Assessment (HSA). Science was measured in grades 5 and 8 and by the Biology HSA starting in 2009. Science is not part of AYP. Performance is reported as the percent of students in each grade who achieved the Basic, Proficient, or Advanced standard. All students should be achieving at the Proficient or Advanced standard. Middle and high school special education students working on grade level content who may need an assessment that is more accessible for a student with disabilities may be eligible to take the Mod-MSA. This is determined by the Individualized Education Program (IEP) Team.

## Baltimore County Alt-MSA Proficiency Levels

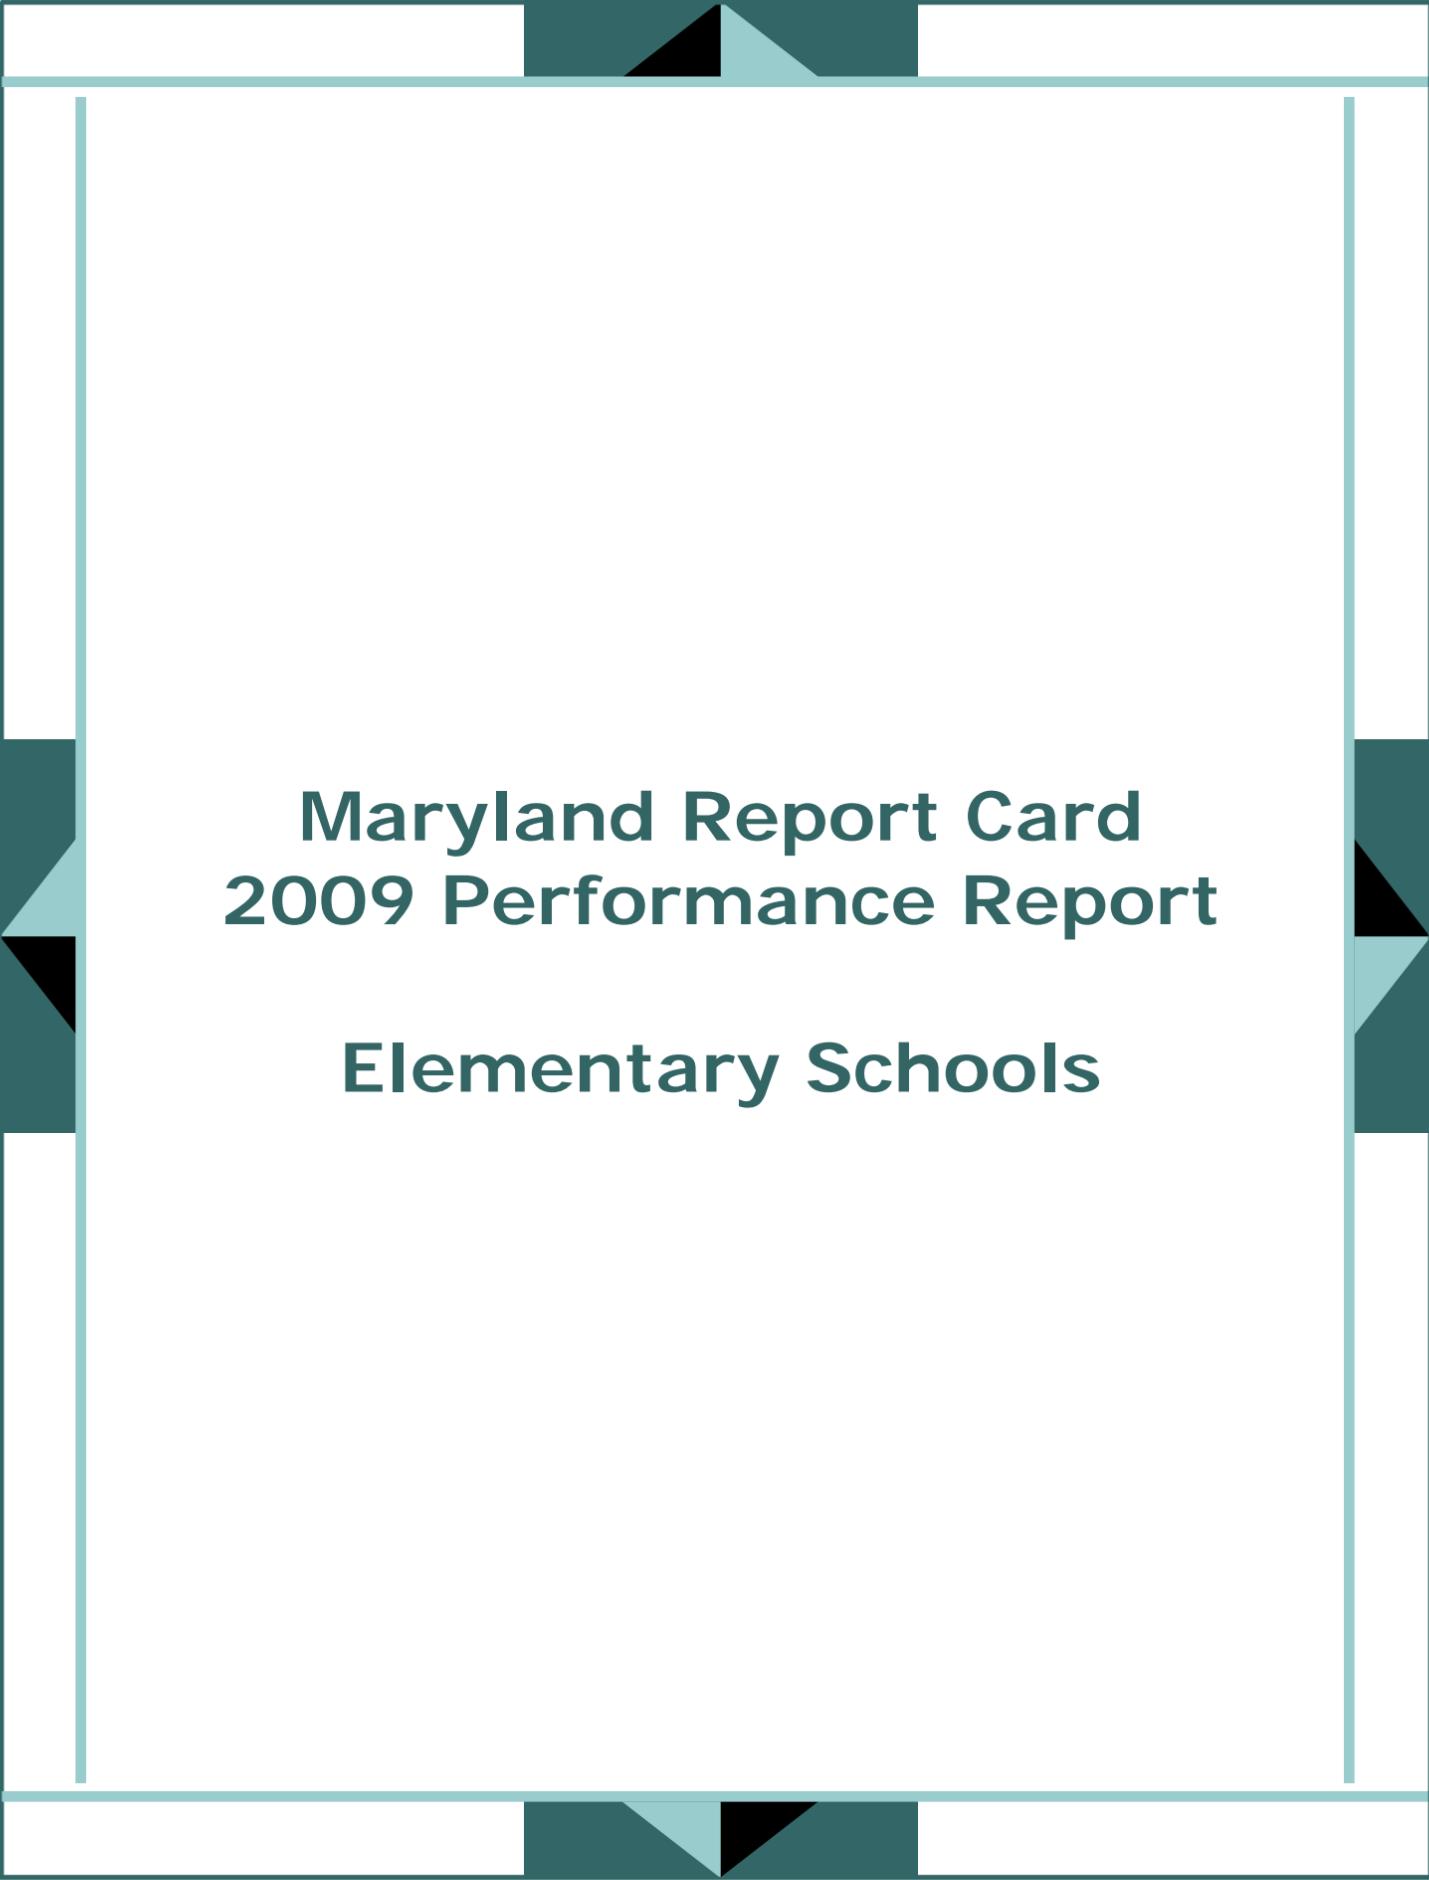

Approximately 1% of Maryland students take Alt-MSA. The Basic Level is below the goal set for all students.

### Alternate Maryland School Assessment (Alt-MSA)

The Alternate Maryland School Assessment (Alt-MSA) is taken by students with disabilities who cannot take the MSA even with the special accommodations they receive as part of their regular classroom instruction. The test measures the student's mastery of reading and mathematics content standards or appropriate access skills. Eligible students take the test in grades 3-8 and once during the high school grade band. Performance is reported as the percent of students in each grade who achieved the Basic, Proficient, or Advanced standard.
